Jack Old - Quality Coordinator

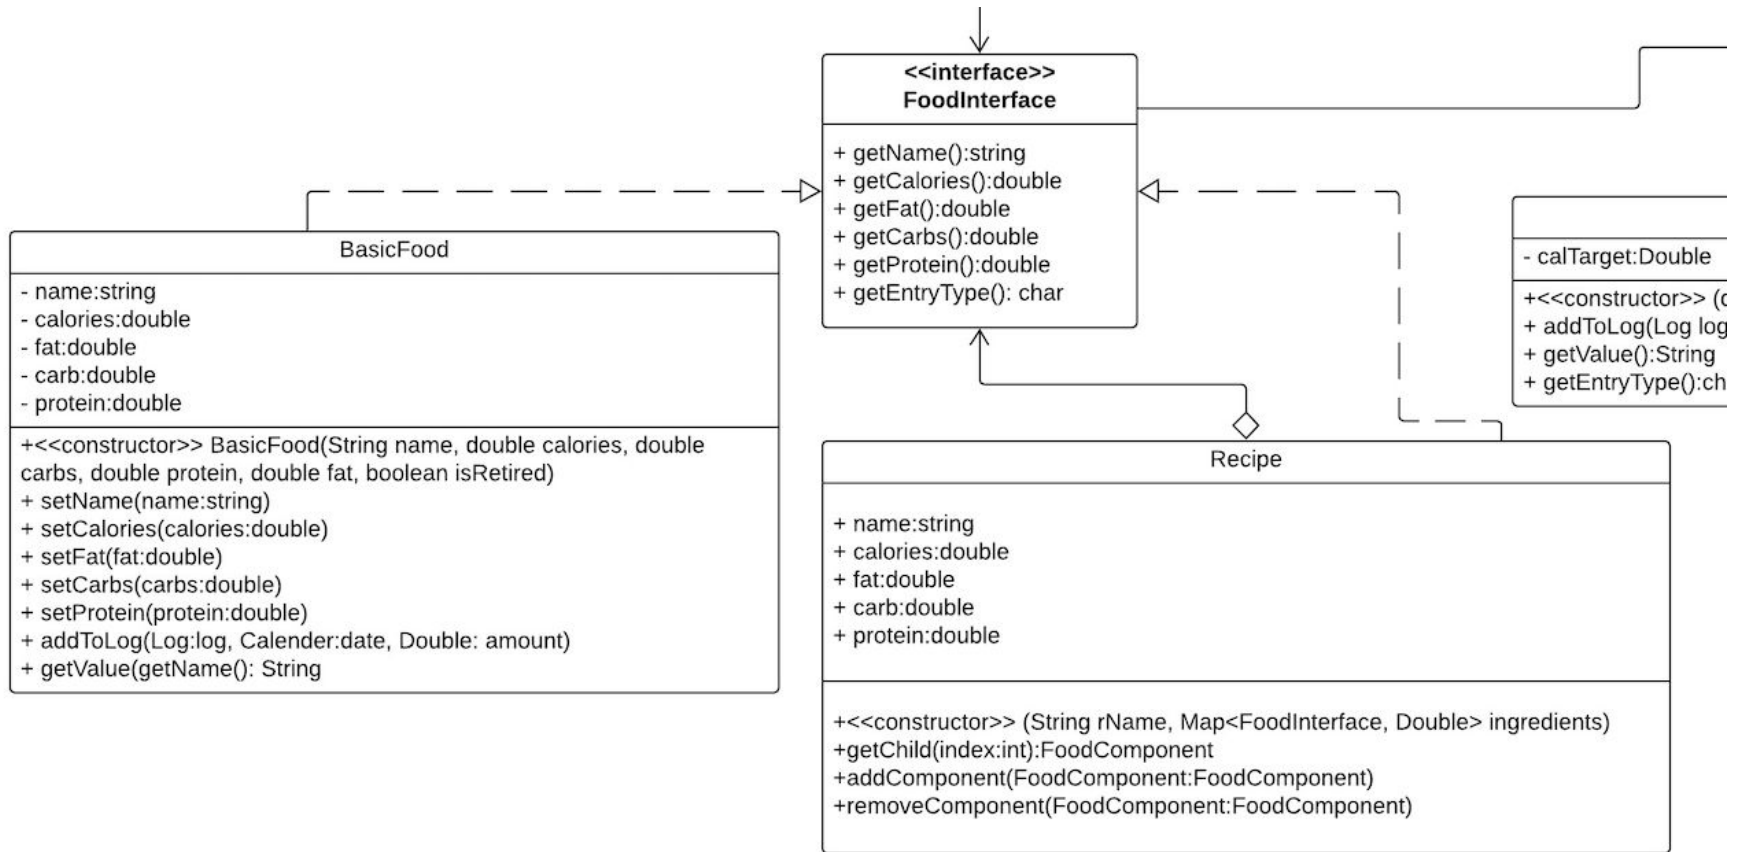

Fred Amartei - Version Control

Fengyi Chen - Requirements

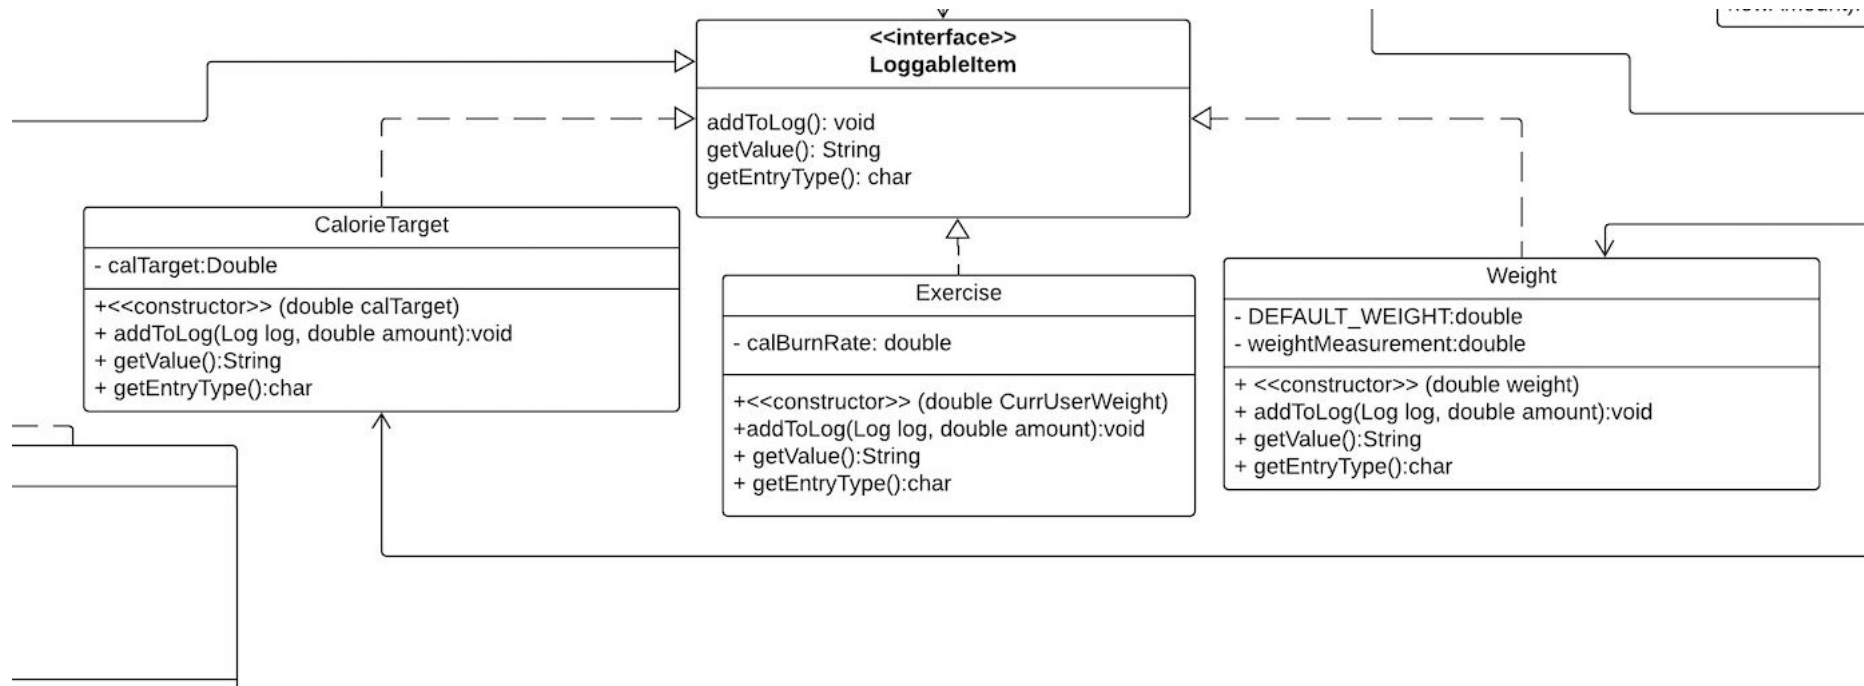

Lowell Pence - Team Coordinator

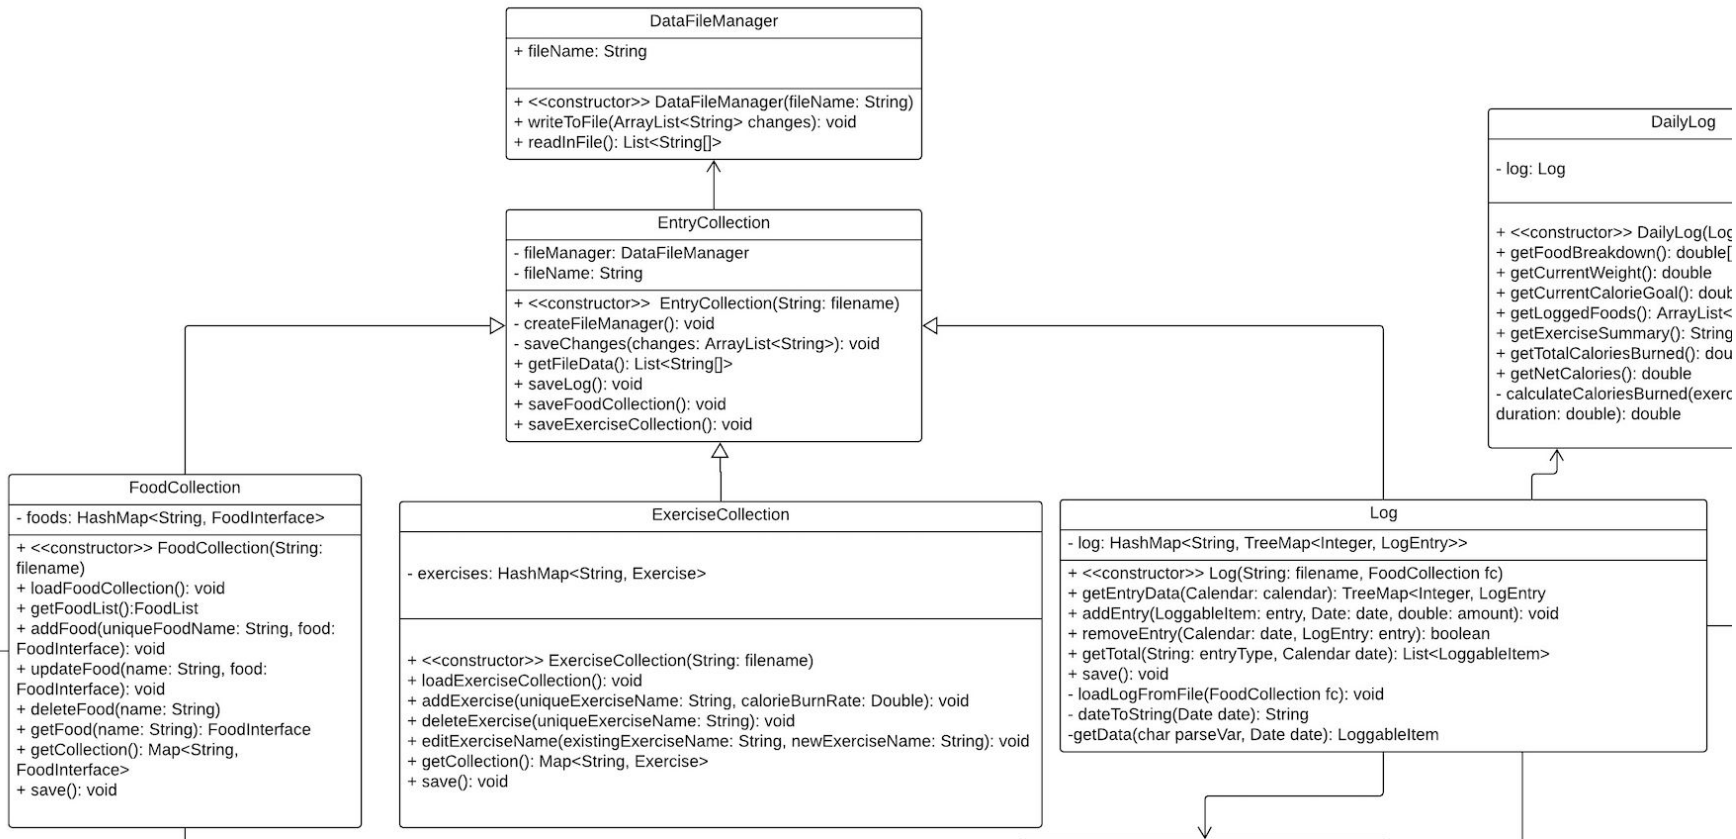

Model

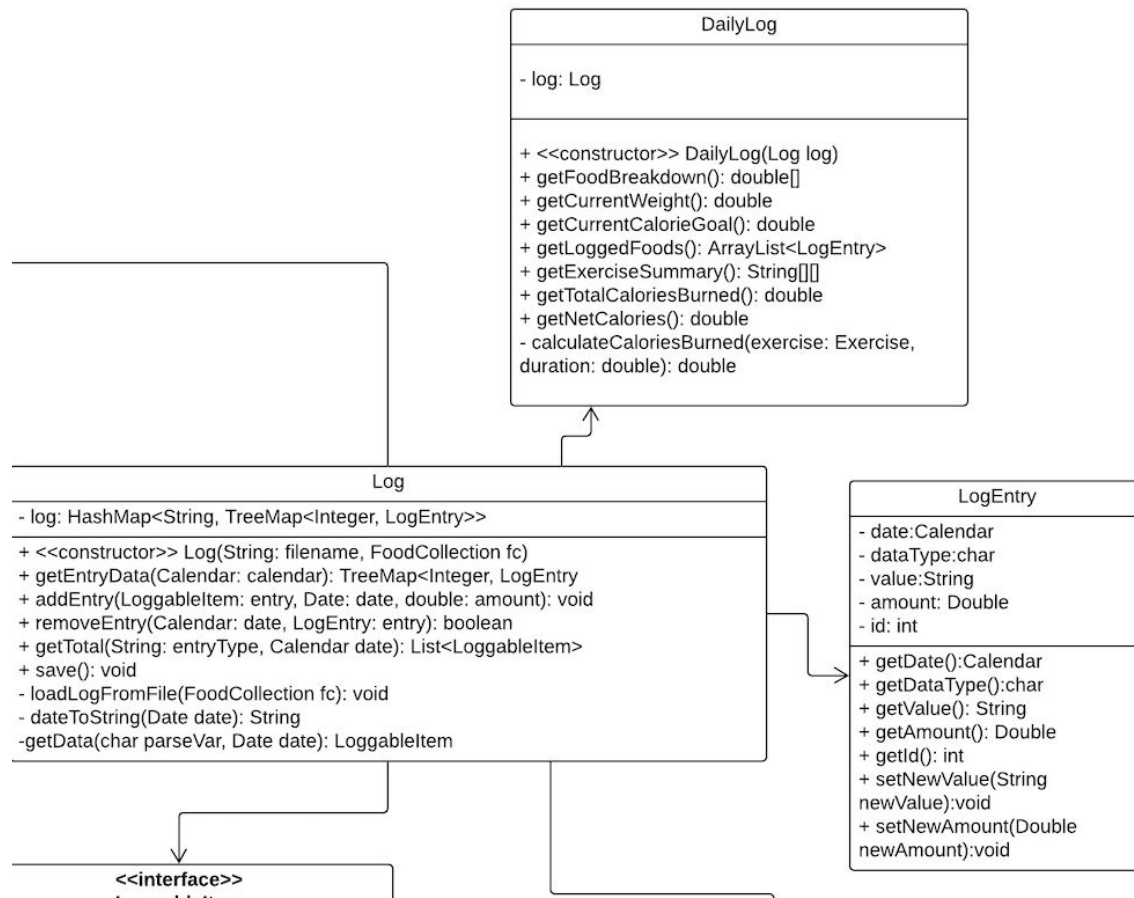

Model - Composite Pattern

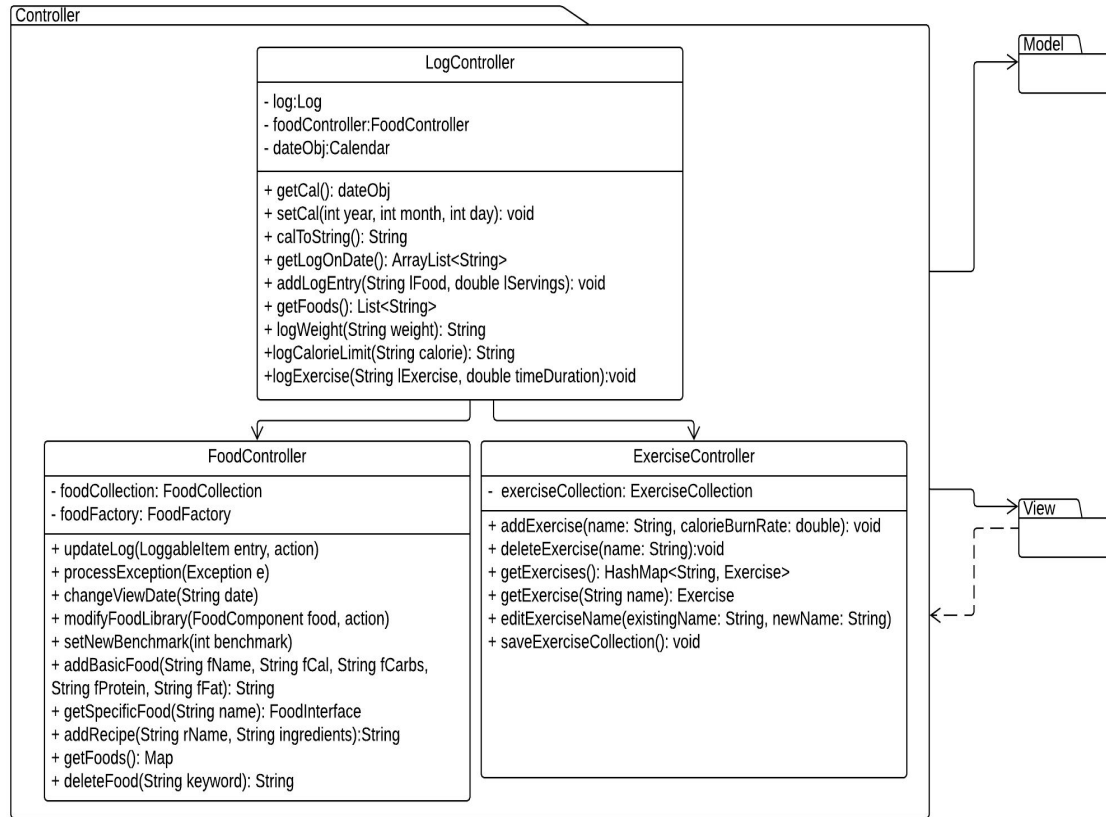

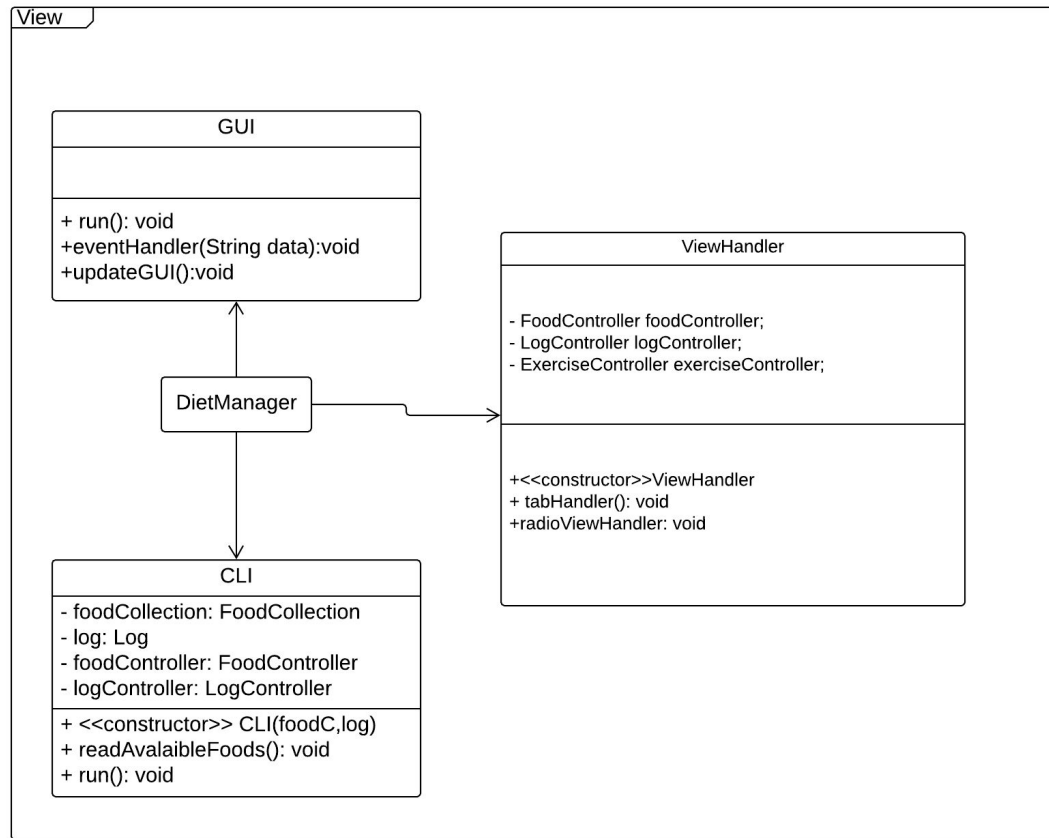

Model - Collection & File Manager

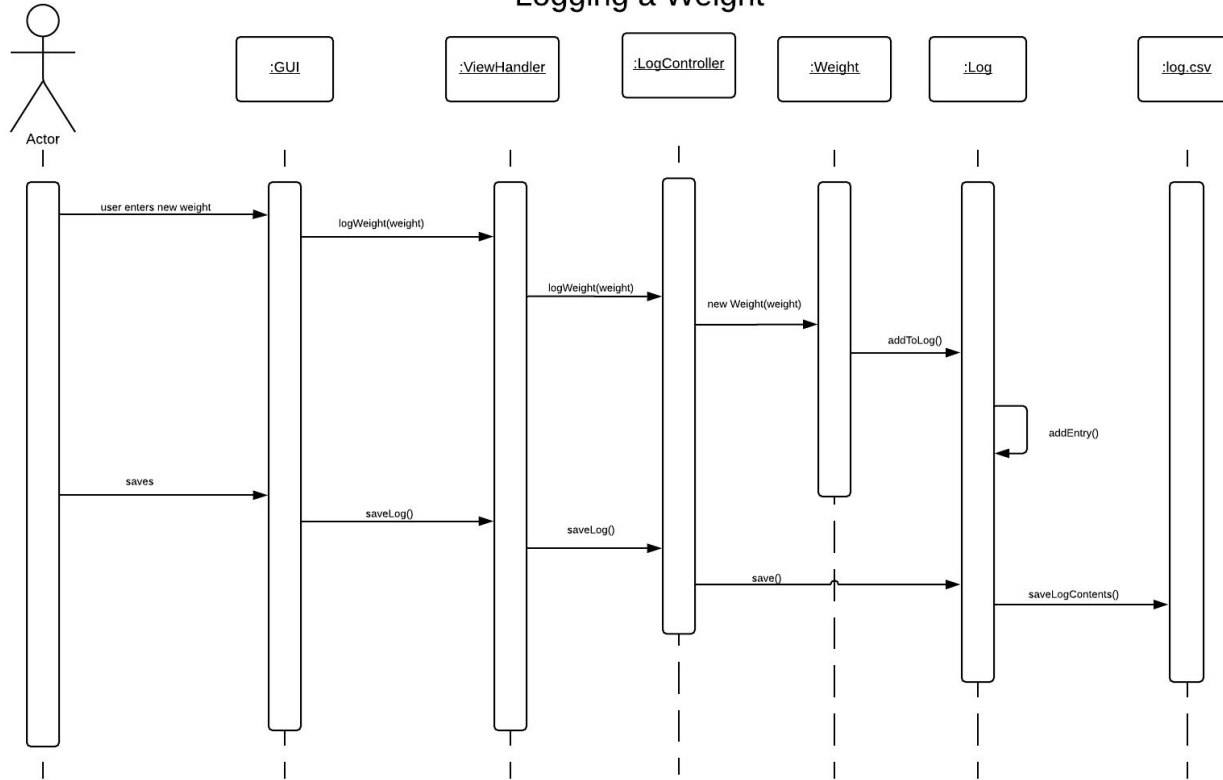

Model - Log Classes

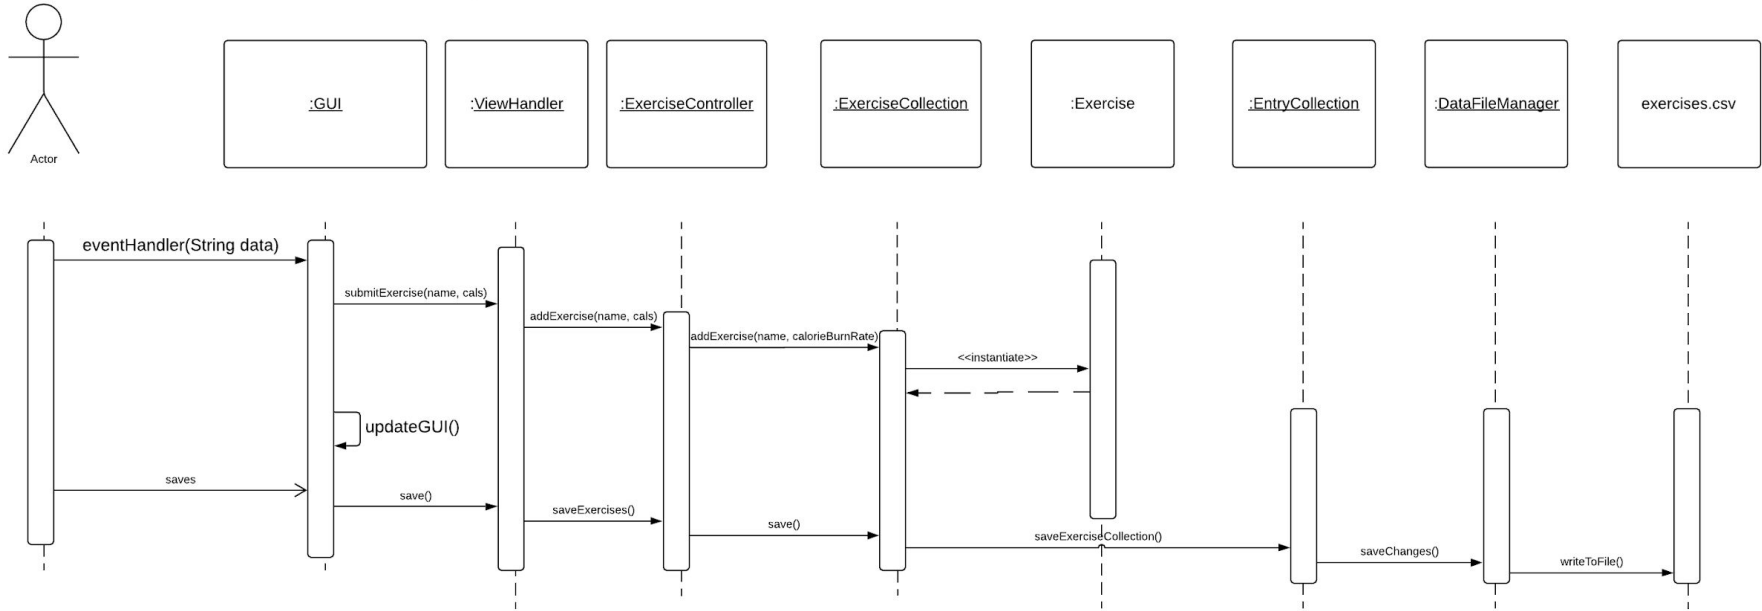

Logging a Weight

Sequence Diagram #3

The Good

- We had a strong understanding of how to implement the requirements.
- Uses JavaFX to future proof the product instead of Swing which is deprecated.
- Worked well together as a group and communicated well.
- Able to overcome most roadblocks.

The Bad

- Struggled with deadlines
- V1 Presentation was more rushed than we had intended
- Deviated from parts of the design once we started development, but ultimately improved the design
